AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph starting on page 15, line 11 as follows:

—Fig. 11 shows the format of the General Subunit Identifier Descriptor to be used in the existing system. The generic information on functions is described in the contents of the descriptor—4. However, the value of descriptor length field itself is not included. The generation ID shows the version of AV/C command set and its value is currently "00h" (h shows hexadecimal notation) as shown in Fig. 12. At this point "00h" means that the data construction and the command are the version 3.0 of the AV/C General Specification. Moreover, as shown in Fig. 12, all values except "00h" are reserved for the future specifications.—

IN THE TITLE

Please replace the title of the above-identified application as follows:

—METHOD OF CONTROLLING DEVICES IN AN AUDIO VISUAL SYSTEM—
